Clinton spent 40 million going after Bill Gates rather than capture bin Laden when he had the chance. Now look where we're at and where are the priorities. Bill Gates is what America is about, the chance to make a difference in the lives of a lot of people and contribute to the economy and provide a lot of jobs. He used his brains to make a buck and many bucks for a lot of people. Because of the DOJ and some crybaby companies everyone in America has lost something. Leave it alone and go after something worthwhile. We in this family are angry. Mary Linker
